

DO YOU HAVE YOUR REFERRAL FORM?

Under most managed care regulations, specialists are not allowed to see patients unless their primary care physician has approved the visit and has given the patient a referral form / referral number authorizing specialist care. If your Primary Care Physician determines you should see a specialist, a referral form will be given directly to you or forwarded to our office.

Failure to follow the plan's regulations could result in discontinuation of the patient's coverage; refusal by the managed care company to pay any charges related to the visit or could require a change from the patient's selected Primary Care Physician.

If your managed care plan requires you to have a referral form from your scheduled visit and you have not made arrangements to obtain one, please contact the receptionist to reschedule your appointment. If you prefer, you may pay all charges at the time of your visit.

Please help us comply with your managed care contract by arranging for a referral form / referral number before each visit.
